

Industry Solutions Checklist

Version 1.1 · 2026-03 · rollout governance and measurable delivery

1. Scope and Baseline

- Confirm account and region scope before the first scan window.
- Baseline idle LB, unattached storage, and stale snapshots by owner.
- Lock billing period and evidence format before optimization starts.

2. Evidence and Review Flow

- Export PDF/CSV/API evidence pack for finance and engineering review.
- Run weekly review with platform, security, and service owners.
- Track each accepted action with owner, due date, and rollback path.

3. Rollout and Governance

- Execute 30/60/90 day rollout checkpoints with explicit exit criteria.
- Use KPI guardrails: coverage, false-positive rate, remediation latency.
- Escalate unresolved high-impact waste to governance board within SLA.
